**Consent Form – Patency Capsule**

---

I CONSENT TO HAVING PATENCY CAPSULE EXAMINATION.

Patency capsule examination is procedure used to verify adequate size of the GI tract to allow passage of the capsule. It is designed to determine if there are strictures in the GI tract that might not allow passage of a camera capsule during capsule endoscopy. The dissolvable capsule is not intended to examine the stomach, small bowel, or colon. It does not replace upper endoscopy or colonoscopy.

The procedure and its risks have been explained to me, along with alternatives of diagnosis and treatment, and I have been allowed to ask questions concerning the planned examination.
